## (54) IMAGE DISPLAY DEVICE

### (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide an image display device in which adding and changing of a format for image signals that are to be inputted are easily coped with.

**SOLUTION:** An image display device (1) has a main body section (2) which includes an input interface means (8) that is used to receive image signals having a prescribed format and an image display means that displays the image signals inputted to the means (8) and an adapter section (4) which is made separable to the section (2) and includes image signal input terminals (22) that are used to receive the image signals, a format converting means (20) that converts the image signals inputted into the terminals (22) to the prescribed format and an output interface means (1) that transmits the image signals converted by the means (20) to the means (8).
